

DVein Innovations Pvt Ltd

# **DVEIN PROJECTS LIST**

Next-Gen Solutions

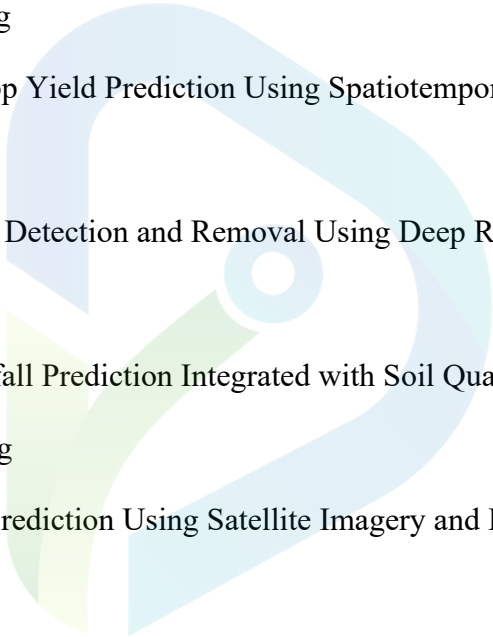

+91-9500181230  
[www.dveininnovations.com](http://www.dveininnovations.com)  
SSPDL-Alpha City IT Park, Navalur,  
Chennai - 600130

# **Artificial Intelligence & Machine Learning**

1. Self-Learning Chatbot using Reinforcement Learning
2. Explainable AI Framework for Medical Diagnosis
3. Zero-Shot Learning for Image Classification
4. AI-driven Video Summarization System
5. Deepfake Detection using Multi-modal Analysis
6. Automated AI Model Compression for Edge Devices
7. Federated Learning-based Financial Fraud Detection
8. AI-assisted Code Generation and Bug Detection Tool
9. Context-aware Personal Assistant using LLMs
10. Vision Transformer for Real-time Object Recognition
11. AI-powered Human Activity Recognition from Video Streams
12. Meta-Learning Approach for Low-Data Environments
13. Generative Adversarial Networks for Image Restoration
14. Adaptive Recommendation Engine using Graph Neural Networks
15. Autonomous Drone Path Optimization using Deep Reinforcement Learning
16. AI-based Document Summarizer using LLM Fine-tuning
17. Intelligent Traffic Pattern Forecasting using Hybrid Deep Learning
18. Energy-efficient AI Inference on Edge Hardware
19. Predictive Analytics for Climate Change Impact Modeling
20. AI Model Watermarking and Ownership Verification

- Multi-Modal Deep Learning for Early Cancer Detection Using Genomic, Imaging, and EHR Data
  - Graph Neural Networks for Predicting Protein-Protein Interactions in Rare Genetic Disorders
  - AI-Powered Drug Repurposing Using Transformer Models and Molecular Docking Simulations
  - Federated Learning for Privacy-Preserving Diagnosis of Alzheimer's Disease
  - Diffusion Models for Simulating Disease Spread in Complex Biological Networks
  - Self-Supervised Learning for Real-Time Anomaly Detection in Network Traffic
  - Generative Adversarial Attacks and Defenses in AI-based Intrusion Detection Systems
  - Homomorphic Encryption and Federated AI for Privacy-Preserving Threat Intelligence Sharing
  - Reinforcement Learning for Adaptive Honeypot Deployment in Cybersecurity Infrastructure
  - Quantum-Inspired AI for Detecting Malware Using Behavioral Signatures
- 

- LLM-Driven Legal Document Summarization with Multi-Jurisdictional Reasoning
- Multilingual Code-Mixed Chatbot Using Retrieval-Augmented Transformers
- Zero-Shot Emotion Detection in Low-Resource Languages Using Cross-Lingual Transfer Learning
- Real-Time Fake News Detection Using Knowledge-Graph Enhanced LLMs
- Intent Recognition in Medical Transcripts Using Domain-Specific Language Models
- Vision-Language Models for Real-Time Navigation in Autonomous Drones
- 3D Reconstruction from Monocular Images Using Neural Radiance Fields (NeRF)
- Human Pose Estimation for Sports Injury Prevention Using Spatiotemporal Transformers
- AI-Powered Satellite Image Analysis for Disaster Prediction and Response
- Scene Understanding in Foggy Weather for Autonomous Vehicles Using Multi-Sensor Fusion

- Multi-Agent Reinforcement Learning for Stock Portfolio Optimization
  - AI-Driven Credit Risk Assessment Using Explainable Deep Learning
  - Smart Pricing Recommendation System Using Deep Contextual Bandits
  - Energy Consumption Forecasting in Smart Cities Using Graph Temporal Networks
  - Detection of Synthetic Identities in FinTech Transactions Using AI-Powered Behavioral Profiling
  - Climate-Aware Crop Yield Prediction Using Spatiotemporal Graph Neural Networks
  - Autonomous Weed Detection and Removal Using Deep Reinforcement Learning Robots
  - LSTM-Based Rainfall Prediction Integrated with Soil Quality Analysis for Sustainable Farming
  - AI for Forest Fire Prediction Using Satellite Imagery and Environmental Sensor Data
  - Predicting Algal Bloom Events in Aquatic Systems Using Deep Spatiotemporal Models
- 

# **Internet of Things (IoT) & Edge Intelligence**

1. Federated Edge IoT for Privacy-preserving Smart Cities
2. Energy-aware IoT Device Management using AI Agents
3. Edge AI-based Smart Farming Drone System
4. Blockchain-enabled IoT Security for Smart Homes
5. Autonomous Greenhouse Environment Control using Sensors and ML
6. IoT-enabled Disaster Early Warning System with AI Prediction
7. Real-time Traffic Flow Optimization via IoT Edge Devices
8. Smart Factory Predictive Maintenance using Digital Twin Simulation
9. Edge Computing for IoT Healthcare Wearables
10. IoT-driven Wildlife Conservation and Tracking System
11. Smart Waste Bin Network with Route Optimization for Collection
12. IoT-based Cold Supply Chain Integrity Monitoring
13. Edge Analytics for Smart Energy Grids
14. Secure Communication Framework for IoT Devices using Lightweight  
Cryptography
15. AI-powered Smart Water Network for Leak Detection

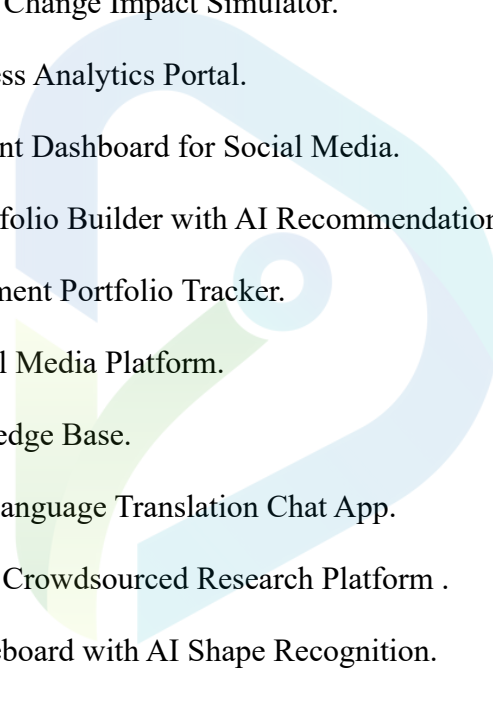

# Cybersecurity & Privacy-Preserving AI

1. Homomorphic Encryption-based Secure ML Model Training
2. Federated Threat Intelligence Sharing Platform
3. Blockchain-driven Cyber Threat Verification Network
4. Quantum-safe Cryptographic Key Exchange System
5. AI-based Insider Threat Detection in Corporate Networks
6. Cyberattack Prediction using Deep Reinforcement Learning
7. Adversarial ML Defense Mechanism for Neural Networks
8. Secure Data Collaboration using Differential Privacy
9. Privacy-preserving Multi-party Computation for Healthcare Data
10. Decentralized Identity Authentication using SSI (Self-Sovereign Identity)
11. Automated Malware Detection using Transformer-based Models
12. DeepFake Voice Detection System
13. Zero-Trust Security Model for Distributed IoT Systems
14. AI-based Risk Scoring Engine for Cyber Incidents
15. Secure Blockchain Audit Trail for Cloud Data Sharing

# Full Stack Python

- AI-Assisted Code Review Platform.
- AI-Powered Legal Document Analyzer
- Intelligent Resume Shortlisting System.
- Smart E-Learning Portal with Adaptive Learning Paths.
- AI-Driven Personal Finance Advisor.
- Real-Time Stock Market Analysis & Prediction Platform.
- Distributed Log Monitoring System.
- IoT Sensor Data Visualization & Prediction Portal.
- Live Sports Analytics Dashboard.
- Smart Traffic Management Web App.
- Blockchain-Based Document Verification Portal.
- End-to-End Encrypted Messaging.
- Cyber Threat Intelligence Sharing Portal.
- Zero Trust Access Management Web.
- Blockchain-Powered Supply Chain Tracking System.
- Telemedicine Platform with Real-Time Diagnostics.
- Drug Discovery Collaboration.
- Personalized Nutrition Recommendation Web.
- AI-Assisted Medical Image Annotation Tool.
- Global Disease Outbreak Tracker.

- 
- AI-Enhanced CRM with Predictive Lead Scoring.
  - Enterprise Workflow Automation Platform.
  - Intelligent Contract Lifecycle Management System.
  - Industrial Machine Downtime Predictor.
  - Dynamic HR Performance Evaluation Portal.
  - Interactive Climate Change Impact Simulator.
  - AI-Powered Business Analytics Portal.
  - Real-Time Sentiment Dashboard for Social Media.
  - Smart Resume Portfolio Builder with AI Recommendations.
  - Data-Driven Investment Portfolio Tracker.
  - Decentralized Social Media Platform.
  - AI-Powered Knowledge Base.
  - Global Real-Time Language Translation Chat App.
  - Community-Driven Crowdsourced Research Platform .
  - Collaborative Whiteboard with AI Shape Recognition.
  - AI-Powered Personal Life Management Portal.
  - Smart Waste Management Dashboard.
  - AI-Powered Judicial Case Outcome Predictor.
  - Real-Time Disaster Response Coordination Web App.
  - Intelligent Job Marketplace with Skill Gap Analysis

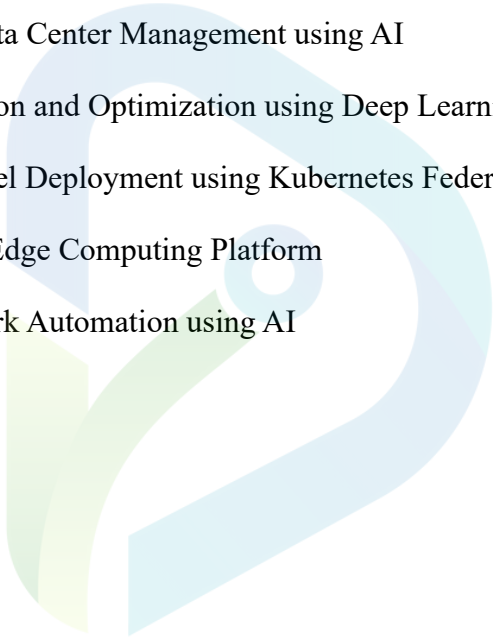

# Full-Stack Java

1. AI-Powered Healthcare Management System
2. Fraud Detection Platform for Banking
3. AI-Driven Smart Agriculture Platform
4. Stock Market Prediction & Trading
5. Personalized Learning Management System (LMS)
6. Decentralized Identity Management System
7. E-commerce Marketplace with Microservices
8. Banking-as-a-Service (BaaS) Platform
9. Cloud-Native Event Streaming System
10. Multi-Tenant SaaS CRM
11. Blockchain-Powered Supply Chain Tracking
12. Digital Wallet with Biometric Authentication
13. Insurance Claim Automation System
14. Next-Gen ATM Simulation
15. Cybersecurity Threat Intelligence Platform
16. Real-Time Ride-Hailing App (Uber-like)
17. Online Gaming Platform with Leaderboards
18. IoT Smart Home Management System
19. Smart Traffic Management Platform
20. Enterprise Resource Planning (ERP) System
21. AI-Enhanced Video Conferencing Platform
22. Collaborative Code Review Platform
23. Decentralized Social Media Platform
24. Enterprise Knowledge Management System
25. Digital Twin Simulation Platform

## **Healthcare & Bioinformatics**

1. Multi-modal AI for Early Cancer Detection (CT + Histopathology)
2. Federated Learning for Privacy-preserving Medical Image Sharing
3. AI-driven Drug Molecule Generation using Graph Neural Networks
4. Personalized Medicine using Genomic Data Analysis
5. Deep Learning for Protein Structure Prediction
6. Mental Health Monitoring using Voice and Text Biomarkers
7. Smart ICU Monitoring using IoT and Edge AI
8. AI-assisted Disease Progression Prediction (Parkinson's, Alzheimer's)
9. Blockchain-based Medical Record Interoperability
10. Digital Twin of Human Organs for Surgery Simulation
11. Explainable AI System for Medical Image Diagnosis
12. Early Sepsis Detection from Real-time Vital Data Streams
13. Automated Prescription Verification using NLP
14. Multi-agent Healthcare Scheduling Optimization System
15. AI-driven Clinical Trial Outcome Prediction

# Cloud, DevOps & Networking

1. AI-assisted Cloud Resource Auto-scaler using Predictive Models
  2. Serverless Workflow Orchestration with Event-driven Architecture
  3. Blockchain-based Multi-Cloud Trust Management System
  4. Cloud-native Microservice Security using Policy-as-Code
  5. Reinforcement Learning for Dynamic Network Traffic Optimization
  6. Energy-efficient Data Center Management using AI
  7. Cloud Cost Prediction and Optimization using Deep Learning
  8. Distributed AI Model Deployment using Kubernetes Federation
  9. 5G-enabled Cloud Edge Computing Platform
  10. Intent-based Network Automation using AI
- 

# **Data Science, Big Data & Analytics**

1. Predictive Analytics for Supply Chain Disruptions
2. Graph-based Social Influence Modeling
3. Big Data Analytics for Climate Pattern Forecasting
4. Financial Market Anomaly Detection using Deep Autoencoders
5. Multi-source Data Fusion for Smart City Insights
6. Predictive Maintenance Analytics for Industrial IoT
7. NLP-based Document Intelligence System
8. Deep Learning for Satellite Image Analytics
9. AI-powered Real-time News Sentiment and Stock Correlation
10. Predictive Model Governance and Explainability Dashboard
11. Scalable Data Pipeline using Apache Spark and Kafka
12. Cross-domain Transfer Learning for Data Scarcity Scenarios
13. AI-driven Predictive Analytics for Sports Performance
14. Intelligent Demand Forecasting using Ensemble Models
15. Deep Time Series Forecasting for Energy Load Balancing

**THANK  
YOU**
